

California Department of Forestry & Fire Protection

CREW CARRYING VEHICLE (CCV)

USE

CAL FIRE's Crew Carrying Vehicle, or CCV, as it is commonly called, is designed to transport a 17-person fire crew from a conservation camp or fire center to a community project or an emergency incident. The CCV, like CAL FIRE's Code 3 Emergency Crew Transport (ECT), is designed with ample storage space for all the equipment needed by the crews. In addition to fire tools, sleeping bags, and personal protective equipment, the CCV carries rations, water and a firefighter's personal affects. The vehicles carry everything the crew needs to be self-sufficient for at least 48 hours. Wherever a CCV is parked, a crew is nearby either providing emergency activities or participating in conservation related work. CAL FIRE has begun replacing its entire fleet of CCVs with ECTs as CCVs are retired through the natural attrition process.

CREW

Seating 17 personnel

MANUFACTURERS

Chassis: International
Ford/GMC

Body: Master Body/Gregory/
B&Z/Valley Tool

SPECIFICATIONS

Gross Vehicle Weight: 33,000 lbs.
Engine: Diesel Powered
Front Axle: 12,000 lbs.
Rear Axle: 21,000 lbs.
Transmission: Allison Automatic
Wheel Base: 188"
