# WILDFIRE ACTIVITY STATISTICS

## FOREWARD

The California Department of Forestry and Fire Protection (CAL FIRE) mission is to protect natural resources on State Responsibility Area from damage by wildfire. The “State Responsibility Area (SRA) is state and privately-owned forest, watershed, and range land.” CAL FIRE provides wildland fire protection for most SRA. The remainder is protected by federal agencies and counties under contract with the State. CAL FIRE also has cooperative fire protection agreements with Federal agencies to provide wildland fire protection on certain federal lands, and provides contracted life and property protection for numerous local governments. This additional protection of other agency land is included in the Direct Protection Responsibility (DPA) of CAL FIRE.

This annual report is a statistical record of wildland fires and damage on CAL FIRE’s DPA. The statistical information provided in this report is gathered from California All Incident Reporting System (CAIRS), which was implemented in CAL FIRE in November 1, 2006. CAIRS collects data on wildland fires, structure fires and other incidents, such as medical emergencies, automobile accidents, lost hikers, hazardous material spills, train wrecks, floods, and earthquakes. The CAIRS data gives CAL FIRE the ability to track their full workload. CAIRS is a web-based subscription service compliant with the United States Fire Administration’s (USFA) - National Fire Incident Reporting System (NFIRS).

How does CAIRS operate? After responding to an incident, fire department personnel complete one or more of the NFIRS modules. The information in these modules describes the type of incident; where it occurred; the resources used to mitigate losses and other information designed specifically to document the nature and causes of fires, hazardous material (HazMat), and emergency medical service (EMS) incidents. Information is also collected on the number of civilian and fire service casualties.

CAIRS is an information-based system with data entry, data storage, and data retrieval, whether for a single incident or in aggregate, accessed via a computer that interacts with the database. CAIRS collects and stores data in the NFIRS 5.0 standard format. CAIRS consists of 11 modules; the Basic Module is to be completed for every incident, with additional modules used as appropriate to describe the incident. One report is completed for each incident. Several modules are optional modules depending on the situation found at the incident scene.

The majority of CAIRS data elements have been collected to provide the historical information in this report.

ACRES PROTECTED BY CONTRACT COUNTY**

# WILDFIRE STATISTICS

ALL AGENCIES

## 2008 FIRE SUMMARY

CAL FIRE's firefighters, fire engines and aircraft respond to over 5,600 wildland fires and answer nearly 200,000 calls for other emergencies each year. During 2008, CAL FIRE responded to 3,593 wildfires within its Direct Protection Area. This represents a decrease of less than .5 percent below last year and 33 percent below the five year average. These fires burned 380,310 acres which is 12 percent below last year and 129 percent above the five year average.

Under an Executive Order from Governor Schwarzenegger, state firefighters increased their readiness for fire season earlier, following two years of minimum rainfall and drought like conditions. As April and May came, vegetation across the state had already begun to dry out.

On June 20, 2008, a severe thunderstorm system moved through northern and central California resulting in over six thousand total lightning strikes in 26 counties. The overwhelming number of lightning strikes, along with record dry conditions sparked over two thousand lightning fires. A combination of aggressive firefighting efforts from CAL FIRE and the US Forest Service, including over twenty-one thousand firefighting personnel from across the state, nation and the world, strategically tackled the suppression of these incidents. Most of the fires occurred in Northern California particularly Butte, Mendocino and Shasta counties. As one of the more severe wildland fire seasons, these fires have taken fifteen lives and destroyed a total of 511 structures.

In late November, a number of wildfires sparked across Southern California in Santa Barbara, Los Angeles and Orange Counties. These fires were extremely destructive destroying hundreds of homes and structures.

The top five fires in acreage burned that started in CAL FIRE'S direct protection area

<b>FIRE</b>	<b>COUNTY</b>	<b>START DATE</b>	<b>ACRES BURNED</b>	<b>FIRE CAUSE</b>	<b>STRUCTURES DESTROYED</b>

This list includes fires 300 acres and greater to which CAL FIRE responded. Reports for these fires have all been submitted in the California All Incident Reporting System (CAIRS)

Definitions :

ACRES BURNED =

Acres burned in Direct Protection Area of CAL FIRE.

STRUCTURES =

Number of dwellings and other structures destroyed or damaged on CAL FIRE jurisdiction.

**LARGE FIRES 300 ACRES AND GREATER  
OTHER AGENCY PROTECTION AREAS**

The information on this list is not a complete or final list of other agency large fires. This information is gathered from the ICS 209 incident reports. Federal agencies are not obligated to report to CAL FIRE concerning their fire activity. CAL FIRE assisted on these fires with either equipment or resources.

Abbreviations used in this list are:

Acres Burned= Acres burned in Direct Protection Area of CAL FIRE, other agencies and total area burned.

Vegetation Type = Type of vegetation burned.

T= Timber

B= Brush

W= Woodland

G= Grass

A= Agricultural Products

Origin D. P. A. =The agency on whose Direct Protection Area (D.P.A.) the fires started.

USFS = United States Forest Service

CC = Contract Counties

MIL = Military Land

NP = National Parks Services

BLM = Bureau of Land Management

LAC = Los Angeles County

LOCAL = Local Fire Departments

## GENERAL FIRE CAUSE DEFINITIONS

**UNDETERMINED** – After investigation the cause of the fire is not known.

**LIGHTNING** – Fire started by lightning.

**CAMPFIRE** – Fire started from a campfire. A “campfire” is “a fire used for cooking, warmth, lighting, ceremonial, or aesthetic purposes, not within a building, mobile home, or living accommodation mounted on a motor vehicle.” (4103.5 PRC) In addition to the traditional type of open campfires, this category includes lanterns, and cooking and warming stoves used in camping or ceremonial activity, etc. when outside a building, mobile home, or living accommodation mounted on a motor vehicle.

**SMOKING** – Fire started from smoking tobacco or other material; includes matches and other heat sources used in smoking.

**DEBRIS BURNING** – Fire started by burning refuse, slash, trash, rights-of-way, or rangeland.

Dooryard – Fire started by burning a trash pile, incinerator, etc., usually with a dooryard-burning permit, Form LE-62.

Other – Fire started by project, contract, slash or other burning, usually with a Project Permit Form LE-7, or application and burning permit, Form LE-5.

**ARSON** – Fire started willfully and maliciously to burn or attempt to burn structures, forest land, or property.

**EQUIPMENT USE** – Fire started by the use of mechanical or electrical equipment.

Stationary Equipment – Fire started by any mechanical equipment that is stationary (not normally portable).

Portable Equipment – Fire started by any mechanical equipment or tool that is portable (not normally stationary).

Other Equipment – Fire started by any equipment not listed above.

**VEHICLE** – Fire started by a motorized transportation vehicle.

**RAILROAD** – Fire started by railroad rolling stock, such as speeder, locomotive, or rail car.

**ELECTRICAL POWER** – Fire started by electric distribution or transmission, powerline – hardware, pole or tower, and conductors, to the user’s meter.

**PLAYING WITH FIRE** – Fire started without malicious intent by adults or children playing or experimenting with fire or fire-causing agents. Includes fires started unintentionally while playing with fireworks, toys, models and other fire-causing devices. When children cause a fire by smoking, the intent determines the cause, i.e., if smoking as a play activity, use “Playing with fire;” if smoking as a smoker, the cause is “Smoking.”

**OTHER CAUSE OR OTHER/MISCELLANEOUS** – Fire started by events or activities that cannot be logically placed in any of the preceding “cause” classifications. Examples are electrical wiring on user’s side of meter, explosives and munitions (without arson intent) fireworks or signal devices (not in play activity), spontaneous combustion, spark from fireplace (when not debris burning), horseshoe spark, light bulb, or natural source (not lightning). Do not use for fires of unknown cause unless “other” is the most logical choice of causes.

AID GIVEN  
AND  
RECEIVED

## **FIRE DEPARTMENT ASSISTANCE GIVEN AND RECEIVED**

Aid given or received, either automatic, prearranged, or mutual for a specific incident are defined below.

Aid Received: A fire department handles an incident within its jurisdiction with additional manpower or equipment from one or more fire departments outside its jurisdiction. Aid received can be either mutually requested by initial responding fire department or automatic aid that was dispatched based on a prior agreement between two jurisdictions.

Aid Given: A fire department responds into another fire department's jurisdiction to provide assistance at an incident or to cover a vacated station while the receiving fire department is busy at an incident.

Other Aid Given: A fire department covers and responds to another jurisdiction or locale that has no fire department.

The State and local agencies often contract with CAL FIRE for fire protection services. CAL FIRE provides a full-service fire department that responds to wildland fires, structure fires, floods, hazardous material spills, swift water rescues, civil disturbances, earthquakes, medical, and other emergencies of all kinds. Local governments are able to utilize CAL FIRE diversity and experience through several kinds of contracts and agreements.

State statute authorizes CAL FIRE to enter into cooperative agreements (Schedule A) with local government entities such as cities, counties, and districts. These contracts provide many forms of emergency services for their communities. The Schedule A agreement itemizes in detail, fire stations, personnel, salaries, operating expenses, rental of state vehicles, maintenance of automobile and radio equipment, and utilities to be financed by the local agency. The positions are filled by state employees, and the salaries, hours, and working conditions are established at state standards.

Another type of cooperative agreement (AMADOR) is available to qualifying counties and special districts to provide for the non-fire season use of CAL FIRE equipment, personnel, and buildings for fire prevention, fire suppression, emergency medical services, dispatching, and other emergency services.
