FOREWARD

WILDFIRE ACTIVITY STATISTICS

The California Department of Forestry and Fire Protection's (CAL FIRE) mission is to protect natural resources on State Responsibility Area from damage by wildfire. The State Responsibility Area (SRA) is state and privately-owned forest, watershed, and range land. CAL FIRE provides wildland fire protection for most SRA. The remainder is protected by federal agencies and counties under contract with the State. CAL FIRE also has cooperative fire protection agreements with Federal agencies to provide wildland fire protection on certain federal lands, and provides contracted life and property protection for numerous local governments. This additional protection of other agency land is included in the Direct Protection Responsibility (DPA) of CAL FIRE.

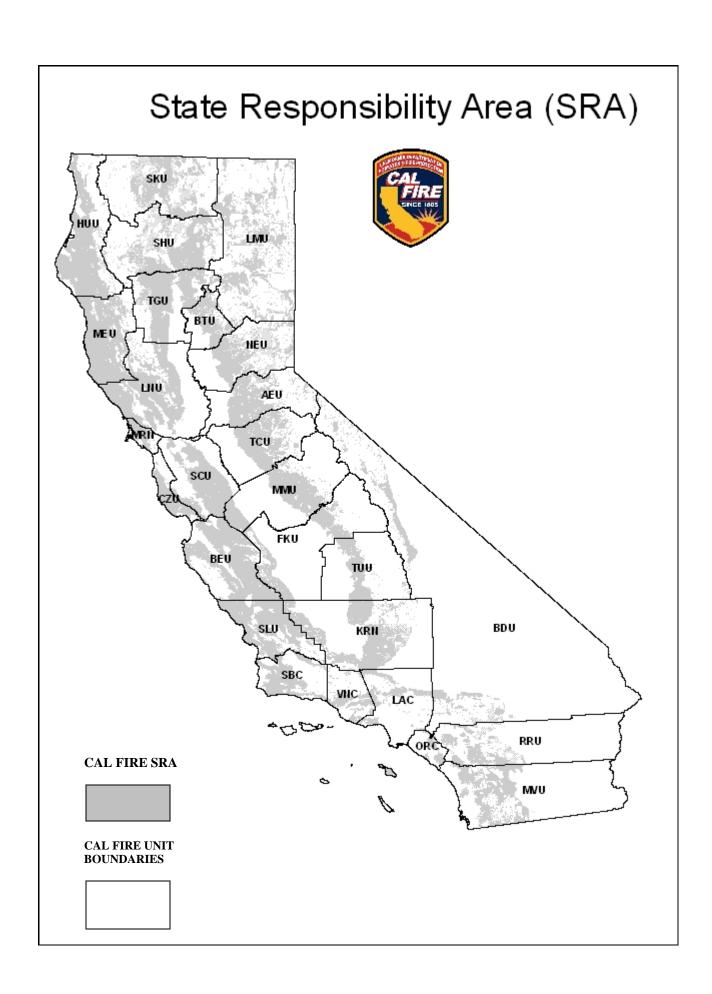

This annual report is a statistical record of wildland fires and damage on the CAL FIRE's DPA. The statistical information provided in this report is gathered from California All Incident Reporting System (CAIRS), which was implemented in CAL FIRE in November 1, 2006. CAIRS collects data on wildland fires, structure fires and other incidents, such as medical emergencies, automobile accidents, lost hikers, hazardous material spills, train wrecks, floods, and earthquakes. The CAIRS data gives CAL FIRE the ability to track their workload. CAIRS is a web-based subscription service compliant with the United States Fire Administration's (USFA) - National Fire Incident Reporting System (NFIRS).

How does CAIRS operate? After responding to an incident, fire department personnel complete one or more of the NFIRS modules. The information in these modules describes the type of incident; where it occurred; the resources used to mitigate losses and other information designed specifically to document the nature and causes of fires, hazardous material (HazMat), and emergency medical service (EMS) incidents. Information is also collected on the number of civilian and fire service casualties.

CAIRS is an information-based system with data entry, data storage, and data retrieval, whether for a single incident or in aggregate, accessed via a computer that interacts with the database. CAIRS consists of 11 modules; the Basic Module is to be completed for every incident, with additional modules used as appropriate to describe the incident. One report is completed for each incident. Several modules are optional modules depending on the situation found at the incident scene.

The majority of CAIRS data elements have been collected to provide the historical information in this report. The data used was obtained from the CAIRS database on February 23, 2010, using the Altaris CAD (Computer Aided Dispatch) system and using Business Objects version XI and Information Technology prepared Crystal Reports.

WILDFIRE STATISTICS

ALL AGENCIES

2009 FIRE SUMMARY

CAL FIRE's firefighters, fire engines and aircraft respond to over 5,700 wildland fires and answer nearly 210,000 calls for other emergencies each year. During 2009, CAL FIRE responded to 4,657 wildfires within its Direct Protection Area. This represents a decrease of 24 percent below last year and 19 percent below the five year average. These fires burned 80,990 acres which is 78 percent below last year and 67 percent below the five year average.

2009 marked the third year of a drought for California. The state saw minimal precipitation over the winter and the grasses and brush began to dry out earlier than usual.

On May 5, 2009, Governor Schwarzenegger signed an Executive Order that bolstered the State's firefighting force. Within hours of the signing of the Executive Order, a wildfire broke out in Santa Barbara County. Within days, the fire had moved into residential neighborhoods in the City of Santa Barbara and began to consume homes. When the fire was finally contained, 8,733 acres were charred and 80 homes and 80 additional structures were destroyed.

The top five fires in acreage that burned in California

FIRE	COUNTY	START DATE	ACRES BURNED	FIRE CAUSE	STRUCTURES DESTROYED

The information on this list is not a complete or final list of other agency large fires. This information is gathered from the ICS 209 incident reports. Federal agencies are not obligated to provide reports to CAL FIRE on fire activity within their jurisdiction. CAL FIRE assisted on these fires with either equipment or resources.

Abbreviations and Terms used in this list are:

Acres Burned= Acres burned in Direct Protection Area of CAL FIRE, other agencies and total area burned.

Vegetation Type = Type of vegetation burned.

T= Timber

B= Brush

W= Woodland

G= Grass

A= Agricultural Products

Origin DPA =The agency on whose Direct Protection Area (DPA.) the fires started.

USFS = United States Forest Service

CC = Contract Counties

MIL = Military Land

NP = National Parks Services

BLM = Bureau of Land Management

BIA = Bureau of Indian Affairs

LOCAL = Local Fire Departments

GLOSSARY

GENERAL FIRE CAUSE DEFINITIONS

ARSON – Fire started willfully and maliciously to burn or attempt to burn structures, forest land, or property.

BUILDING – Any structure used or intended for supporting or sheltering any use or occupancy that is defined in the California Building Code, 1994 Amendments, Chapter 2.

CAMPFIRE – Fire started from a campfire. A "campfire" is "a fire used for cooking, warmth, lighting, ceremonial, or aesthetic purposes, not within a building, mobile home, or living accommodation mounted on a motor vehicle." (4103.5 PRC) In addition to the traditional type of open campfires, this category includes lanterns, and cooking and warming stoves used in camping or ceremonial activity, etc. when outside a building, mobile home, or living accommodation mounted on a motor vehicle

CONTRACT COUNTIES – Contract Counties (CAL FIRE Pays Local Government for Services) Section 4133 of the Public Resources Code and Section 55607 of the Government Code permit the CAL FIRE Director to contract with counties for protection of State Responsibility Area (SRA). In California, six counties provide fire-prevention services in SRA under contract with the state. The counties of Kern, Los Angeles, Marin, Orange, Santa Barbara and Ventura have assumed this responsibility.

DEBRIS BURNING – Fire started by burning refuse, slash, trash, rights-of-way, or rangeland.

<u>Dooryard</u> – Fire started by burning a trash pile, incinerator, etc., usually with a dooryard-burning permit, Form LE-62.

Other – Fire started by project, contract, slash or other burning, usually with a Project Permit Form LE-7, or application and burning permit, Form LE-5.

DIRECT PROTECTION AREA – That area for which a particular fire protection organization has the primary responsibility for attacking an uncontrolled fire and for directing the suppression action. Such responsibility may develop through law, contract, or personal interest of the firefighting agent (e.g., a lumber operator). Several agencies or entities may have some basic responsibilities (e.g., private owner) without being known as the fire organization having direct protection responsibility.

ELECTRICAL POWER – Fire started by electric distribution or transmission, power line – hardware, pole or tower, and conductors, to the user's meter.

EQUIPMENT USE – Fire started by the use of mechanical or electrical equipment.

<u>Stationary Equipment</u> – Fire started by any mechanical equipment that is stationary (not normally portable).

<u>Portable Equipment</u> – Fire started by any mechanical equipment or tool that is portable (not normally stationary).

Other Equipment – Fire started by any equipment not listed above.

INCENDIARY – Fire is intentionally ignited under circumstances in which the person knows that the fire should not be ignited.

GENERAL FIRE CAUSE DEFINITIONS - CONTINUED

LIGHTNING – Fire started by lightning.

LOCAL GOVERNMENT – Fire department, especially of a municipal government, whose purpose is preventing and putting out fires

OTHER CAUSE OR OTHER/MISCELLANEOUS – Fire started by events or activities that cannot be logically placed in any of the preceding "cause" classifications. Examples are electrical wiring on user's side of meter, explosives and munitions (without arson intent) fireworks or signal devices (not in play activity), spontaneous combustion, spark from fireplace (when not debris burning), horseshoe spark, light bulb, or natural source (not lightning). Do not use for fires of unknown cause unless "other" is the most logical choice of causes.

PLAYING WITH FIRE (P-W-F) – Fire started without malicious intent by adults or children playing or experimenting with fire or fire-causing agents. Includes fires started unintentionally while playing with fireworks, toys, models and other fire-causing devices. When children cause a fire by smoking, the intent determines the cause, i.e., if smoking as a play activity, use "Playing with fire;" if smoking as a smoker, the cause is "Smoking."

RAILROAD – Fire started by railroad rolling stock, such as speeder, locomotive, or rail car.

SCHEDULE A – Schedule A (Local Government Pays for CAL FIRE Services). Public Resources Code 4142 allows CAL FIRE to provide fire protection/emergency services to local governments under contracts.

SCHEDULE B – State personnel and resources, performing the state (CAL FIRE) mission, using state funding.

SCHEDULE C – Local Government employees that work under the Supervision of CAL FIRE, via the authority of a cooperative agreement.

SMOKING – Fire started from smoking tobacco or other material; includes matches and other heat sources used in smoking.

STATE RESPONSIBILITY AREA (SRA) – Areas of the State in which the financial responsibility of preventing and suppressing fires has been determined by the State Board of Forestry pursuant to PRC 4125, to be primarily the responsibility of the State (PRC 4102).

UNDETERMINED – includes those fires that have not yet been investigated or those that have been investigated, or are under investigation, and have insufficient information to classify further.

VEHICLE – Fire started by a motorized transportation vehicle.

WILDFIRE – As defined in Public Resources Code Sections 4103 and 4104. Wildland: Uncultivated land, other than fallow, neglected or maintained for such purposes as wood or range-forage production, wildlife, recreation, protective watershed cover or wilderness.

WILDLAND FIRE – Any fire occurring on undeveloped land.
