

## Firefighter Property (FFP) Program

### Federal Supply Condition Codes

A Federal Condition Code is a single character of the Supply condition code. The Supply condition code is assigned by the activity turning in the property to DLA Disposition Services. Supply condition codes are defined as follows:

#### ***A - Serviceable - Issuable without Qualification***

New, used, repaired, or reconditioned material which is serviceable and issuable to all customers without limitation or restrictions. Includes material with more than 6 months' shelf life remaining.

#### ***B - Serviceable - Issuable with Qualification***

New, used, repaired, or reconditioned material which is serviceable and issuable for its intended purpose but which is restricted from issue to specific units, activities, or geographical areas because of its limited usefulness or short service life expectancy. Includes material with 3 through 6 months' shelf life.

#### ***C - Serviceable - Priority Issue***

Items which are serviceable and issuable to selected customers, but which must be issued before Condition A and B material to avoid loss as a usable asset. Includes material with less than 3 months' shelf life remaining.

#### ***D - Serviceable - Test/Modification***

Serviceable material which requires test, alteration, modification, conversion or disassembly. This does not include items which must be inspected or tested immediately prior to issue.

#### ***E - Unserviceable - Limited Restoration***

Material which involves only limited expense or effort to restore to serviceable condition and which is accomplished in the storage activity where the stock is located.

#### ***F - Unserviceable – Repairable***

Economically repairable material which requires repair, overhaul, or reconditioning. Includes repairable items which are radioactivity contaminated.

#### ***G - Unserviceable – Incomplete***

Material requiring additional parts or components to complete the end item prior to issue.

#### ***H - Unserviceable – Condemned***

Material which has been determined to be unserviceable and does not meet repair criteria; includes condemned items which are radioactivity contaminated, Type I shelf life material that has passed the expiration date, and Type II shelf life material that has passed the expiration date and cannot be extended.
