

Cribwall #2 2015 Timber Sale
Pre-Bid Tour Questions and Responses
April 17, 2015

Q: Where are buried telephone lines located on project area and associated roads?

A: Buried telephone lines are located along the entire length of JDSF Road 300 from Highway 20 at Camp 19 to the intersection of Road 300 and Road 350. Previous excavation work in this segment of road in has determined that the buried line is generally located on the inboard edge of the road. The line will be located and marked by the utility company prior to the commencement of road work.

Q: Can a map showing the previously harvested groups be provided?

A: Yes. The groups have been added as a feature to the THP map. The map is included with this response.
