Subject: MRC PTEIR HCP ITP NCCP – Request to extend public comment pe

To: [mrc.hcpitp@noaa.gov](mailto:mrc.hcpitp@noaa.gov)

I am a Retired Bio. Prof. & respectfully request that your agencies extend the primary reasons to extend the public comment period is to take into account the Commission is presently considering whether to list the Northern Spotted Owl species under the California ESA.

Extend the public comment period for at least 90 days. This allows for events Commission to be more fully incorporated.

The proposed action fails to account for the recovery goal for Marbled Murrelet protections is a glaring deficiency. The National Marine Fisheries Service's ir Conservation Plans should be utilized as a starting point.

The proposed action is for a take permit that would be in place for decades.

Sincerely,

William Denneen
